

PLEASE NOTE:

- ONLY the green colony (circled) is open to hunting. Nearby colonies within TA 49, 50, and 51 (pink colonies) are **NOT** open to hunting at this time. Hint: You should not be hunting west of the drainage.
- To reach the green colony, drive south on MSR 1 until it intersects with MSR 14. Turn right at this intersection (stay on the paved road). In about 150 meters, reach another intersection with a dirt road. The green colony is north of this dirt road and (mostly) west of the paved road.
- Since it was last mapped, the green colony has expanded to the east side of MSR 1 (paved road), in TA 47. This area of the colony is open to hunting.
